Alison Morgan

Mount Sinai, NY · alisonlynnemorgan2@gmail.com · alisonlynnemorgan.com

Summary

Head of product with 10+ years building data platforms and integrations wherever customers build: APIs, webhooks, datasets, MCP for AI agents, Snowflake, Databricks, and open sharing. Grew AccuWeather's Data Suite from 20% to 60% of deal volume, put its marketplace on track for 2.5x revenue. Known for launching 0 to 1 data products across regulated and global markets, partnering closely with cross-functional teams.

Experience

AccuWeather

July 2025 - present (Remote)

Took on Head of Product scope in March 2026

Senior Product Manager, Enterprise Data Services July 2025 - present
Serving as Head of Product, Data Suite March 2026 - present

- Grew the Data Suite from 20% to 60% of deal volume, tripling average deal size (~$60K), delivering +18% YoY portfolio growth and $XM in net new business in 2026 by partnering with a 25 person revenue team across BD, sales, and account management to standardize go to market playbooks, pricing, and terms.
- Put Snowflake and Databricks marketplace revenue on track for 2.5x growth and lifted listing click-through 125% by packaging Historical Forecasts with free trials and sample datasets for sales demand forecasting.
- Launched the Lightning Data Suite, 0 to 1, turning an acquired detection network into a monetized product across APIs, datasets, and webhooks: $165K closed-won and $1M pipeline. Leading a real-time webhooks beta with $450K pipeline against a $1.2M serviceable market driven by site-safety requirements.
- Rebalanced self-service and enterprise packaging across delivery channels, adding MCP to the $500/month tier and redesigning the pricing page to drive upgrades, doubling higher-tier plans.
- Shipped MCP servers that make weather data available to LLMs and AI agents; pitched 110+ retailers and brands at Shoptalk on weather-driven demand forecasting and personalization.
- Relaunched the self-service developer portal on Zuplo and Stripe for a global customer base (~50% international), with 3D Secure compliance for EU and India. Increased 50% conversion and 50% CSAT.
- Designed data deletion and retention workflows with Legal and Support, mapping which API systems held personal data and what could legally be retained.
- Operational AI: built a full developer platform prototype to set the vision and generate requirements, state management, and behavior specs that feed into Atlassian MCP, plus scheduled Agents on Databricks and Hubspot that feed monthly and quarterly executive reviews.
- Manage the Director of Solutions Engineering, supporting live deals and rep training, shortening sales cycles to ~60 days; present Data Suite strategy to the leadership team twice a year.

Candid

April 2020 - July 2025 (Remote)

Promoted 3 times in 5 years

Senior Director of Product Management July 2024 - July 2025

- Drove 15% revenue growth and doubled API usage by launching Charity Check for California AB 488 across SaaS, API, dataset, and partner channels, including a consent capture flow that let verified nonprofits override a two week government data lag and keep receiving donations.
- Increased lead generation 200% by launching data on Snowflake and Wharton WRDS marketplace.
- Led programing to expand the Seal of Transparency program globally, letting international nonprofits verify equivalency determination status and become discoverable to U.S. foundations funding international work.
- Directed 3 PMs (APIs, datasets, data collection and normalization) to unify ingestion, entity resolution, and normalization into one real-time data network; defined match-quality requirements and led UAT.
- Set OKRs with the Chief Data Officer for a 40+ person product org; founded Candid Labs, a rapid prototyping program for generative AI data products; led 50+ developer interviews and 20+ customer roadmap reviews.

Candid (Continued)

Director of Product Management

- Drove 64% revenue growth on Candid's $10M data platform by shipping 22 major API and dataset releases with a 15+ person engineering team.
- Improved the Demographics via Candid contributor network: 1,000+ nonprofits a month sharing consent-based data, schema extended to fiscally sponsored projects, and usage grown 78,000% to 1.5M annual API calls across API, Snowflake, Tableau, and Salesforce.
- Secured a $365K Tableau Foundation grant to build a demographics dashboard for program officers.
- Hired 3 product managers and led a solutions engineering team supporting 150+ enterprise clients.
- Spoke as an expert panelist on nonprofit data and API ecosystems at 2 industry conferences (PEAK and TAG).

Senior Platform Product Manager December 2020 - July 2022
Platform Product Manager April 2020 - December 2020

- Launched a GraphQL Taxonomy API (subject codes, populations served, organization types) and led Philanthropy Classification System version rollouts across the platform; modernized REST APIs and the .NET SDK, driving 26% growth in monthly active users.
- Partnered with Apple's business development team to build the first API for compliant Apple Pay donations, achieving a 5,500% YoY usage increase.
- Led 3 data analysts delivering custom datasets for 125+ clients, generating $2.7M ARR; released an NLP API for real-time nonprofit news, grants, and RFP alerts

Broadridge Financial Solutions

January 2015 - April 2020 (Edgewood, NY)

Promoted 4 times in 5 years

Senior Digital Strategist September 2019 - April 2020

- Managed developer portal roadmap and API ecosystem strategy, improving developer adoption through documentation, APIs, and self-service capabilities.
- Led data driven product experimentation by validating 70+ proxy communication prototypes through user research, launching mobile first communication solutions, and leveraging A/B testing and analytics to drive a 2x increase in proxy votes and 39% engagement across ~750K emails.

Product Specialist August 2018 - September 2019
Project Coordinator / Scrum Master July 2017 - August 2018
Supervisor, Quality Audit February 2016 - July 2017
Management Trainee, Operations January 2015 - February 2016

Education & Certifications

Stony Brook University

Stony Brook, NY

- Bachelor of Science in Applied Mathematics and Statistics

PMC-V Certified (Pragmatic Institute)

April 2024

- Completed Foundations, Focus, Design, Price, and Launch courses

Additional Skills

- **Data:** Data marketplace listings, onboarding, consent, data governance, taxonomy, packaging and pricing, activation, entity resolution, data normalization, ETL, event-driven architecture, Snowflake, Databricks, SQL
- **AI:** MCP, LLMs, agentic workflows, AI prototyping, Claude, ChatGPT
- **Tools:** Salesforce, Salesforce Marketing Cloud, HubSpot, Dynamics 365, Braze, The Trade Desk, Stripe, Google Analytics, Power BI, Tableau, Postman
- **Technical:** REST APIs, GraphQL, webhooks, SDKs, Azure, AWS (SNS, S3), Zuplo, developer portals
- **Product leadership:** Product and platform strategy, 0 to 1 and 1 to N, marketplace economics, go-to-market, partner ecosystems, OKRs, executive communication, hiring, coaching
